TREATMENTS

P-Stem and P-Shot (PRP with Stem Cells)

- The P-Stem procedure uses growth factor-rich PRP from your bloodstream
- Platelets stimulate blood vessels and nerves to grow Improves both the functionality and sensation in the penis
- The P-stem uses stem cells which can be taken from your own fat along with the PRP from your blood
- A quick and generally comfortable procedure Results can last up to and beyond a whole year

Shockwave Therapy to Penis and Perineum

- Shockwave therapy uses precisely targeted sound waves to stimulate the nerves and blood vessels of the penis
- Sends thousands of sound wave pulses into the penile tissue and works in tandem, resulting in proper stimulation safely and comfortably leads to improved circulation in the penis and enhances sensation
- Triggers your body's own natural healing processes

TREATMENTS

Bio-Identical Testosterone Therapy

- Comprehensive hormonal axis evaluation including free and total testosterone and DHEA
- Discover if andropause is a factor that's slowing things down
- Bio-Identical Testosterone replacement is a natural and effective way to fix low Testosterone levels

Emsella

- Utilizes electromagnetic energy to deliver thousands of maximal pelvic floor muscle contractions in a single session.
- These contractions re-educate the muscles of pelvic floor
- Help with maintain lasting power and control

Individualized Compounded Medications

- Sometimes specialized medications are the best solution when all else fails
- We formulate based on individual needs

MAINTENANCE SESSIONS

Emsella Shockwave Therapy
